Merna Addison Time Sheet for Advanced C++ Group Project - Baseball Simulator

				, , ,
Date	Time Start	Time End	Total	What was worked on
9/12/17	7:15 PM	8:05 PM	0:50	1. Had a group meeting before and at beginning of class. We discussed the project, where to start and how to procede. 2. I set up gitHub repository with collaboration and sent the invitations to the members of the group.
9/13/17	10:30 AM	11:22 AM	0:52	1. I set up local git repository and uploaded our first version of the program that James put together to our gitHub repository. 2. Emailed the group. 3. I did some research on baseball stats. 4. Worked on some organization for the project.
9/17/17	1:30 PM	4:00 PM	2:30	1. Researched existing formulas for baseball game prediction such as the pythagorean theorem baseball. 2. Added vectors, user input, and output to existing code that Brian had put together as well as a few other minor changes. 3. I uploaded the program with the changed I made to a new github branch. 4. I emailed the group letting them know what I had done and asking for input.
9/17/17	5:15 PM	5:45 PM	0:30	1. Fixed an output issue for user choices for away team so that numbers displayed properly for user instead of just the vector index number and skipping the hometeam and uploaded to github.
